1. File Format

Provide a high-resolution file in PDF or EPS format, generated in Adobe Illustrator or any other graphic design software for vector artwork. This ensure that the logo is editable and resizable without reducing the graphic quality.

- JPEG, TIFF, PSD or GIF files will not be accepted
- Artwork pulled or copied from a web site can not be accepted

2. Black and White

Logo artwork and text must be solid black on a white background. Logo must not have any tints, screens or graduation.

3. Logo Design

If you do not have a finalised logo, our in house team could possibly give a helping hand.

Your logo must be submitted with sharp, solid and with clean edges. If there are too many intricate details, we will not be able to produce a die of your logo.

4. Logo with Fonts

Logos submitted with fonts must be converted to outlines or you will be responsible for providing the specific font files along with the artwork.

5. Pricing and Lead time

We offer free print dies for orders over £100, otherwise, there is an initial cost to produce the print die of £50. We retain this for every future order you place.

The minimum print order is 100 pieces per size.

For foil print:

- Less than 100 pieces per item - 25p per print
- More than 100 pieces per item – 10p per print

Lead time from artwork approval is approximately 2-3 weeks.

Unfortunately you can't click all of this through our website to order, so drop us a call or email and we can talk through how we can best help you.

6. Samples

If you would like to see a printed sample before ordering, we can send an example with a print from an existing print die free of charge. If you need to see exactly how your logo will look on a specific box then the cost will be £50 for the print die and then £10 for each type of box sampled.
